

FOR IMMEDIATE RELEASE

11<sup>th</sup> June 2024

**Composites Connections/International Composites Summit**  
(a joint venture between Composites UK and The Fluency Business Group)

## **The International Composites Summit Celebrates Visitor Registration Launch with a New Brand and Website**

The International Composites Summit (ICS) is thrilled to announce the launch of visitor registration with refreshed branding and a new website for the 2024 show. ICS is the UK's only event dedicated to the global composites industry.

Now in its fourth year, ICS is recognised as a catalyst for driving progress and excellence in composite materials and technologies. With the revamped branding and user-friendly website, the organisers – Fluency and Composites UK - are excited to provide attendees, partners, and exhibitors with an enhanced experience that reflects the dynamism and forward-thinking nature of the event.

The new vibrant colours and dynamic visuals allows the event to differentiate its multidimensional elements so everyone involved can see announcements from each area of the show at-a-glance – whether that be a new speaker, sponsor, or exhibitor.

In addition to the refreshed branding, ICS is delighted to unveil its new website, which serves as a comprehensive hub for all things related to the show. Designed with user convenience in mind, the website offers intuitive navigation, seamless access to information, and interactive features.

Key features of the new website include:

- Detailed information about the summit, including schedule, speakers, and exhibitors.
- Registration portal for attendees and exhibitors.
- Information about co-located events.
- News and updates on the latest developments from the show and its exhibitors.

The website also integrates a brand-new registration system to help streamline the sign-up process and give attendees more control over their profile.

For more information about the International Composites Summit, to register for the 2024 show and experience the new branding and website, please visit [www.internationalcompositessummit.com](http://www.internationalcompositessummit.com).
